Frequently Asked Questions (FAQ)

Q1: My RC buggy won't turn. What should I do?

A1: First, consult your RC electric buggy manual's troubleshooting section. Common causes include a faulty servo, a low battery, or a problem with the radio receiver. Check the servo's power connection, inspect the steering linkage for damage, and ensure the battery is adequately charged. If the problem persists, you may need to replace the servo.

Q2: How often should I charge my RC buggy battery?

A2: Your RC electric buggy manual will specify recommended charging times and procedures. Generally, it's best to charge the battery after each use, avoiding deep discharges, as this can shorten its lifespan. Always use the

charger recommended by the manufacturer and never leave the battery unattended during charging.

Q3: How do I clean my RC electric buggy?
