Frequently Asked Questions (FAQs)

Q1: What are the differences between standard scores and age equivalents in the Vineland II?

A1: Standard scores compare an individual's performance to the performance of same-aged peers, indicating how far above or below the average they score. Age equivalents represent the chronological age at which the average individual achieves a given score. While age equivalents are easily understandable, standard scores provide a more precise and statistically meaningful comparison. The Vineland II scoring manual emphasizes the importance of focusing on standard scores for clinical interpretation due to their superior psychometric properties.

Q2: How do I handle missing data when scoring the Vineland II?
