FAQ

Q1: What is the difference between DownScan Imaging and SideScan Imaging?

A1: DownScan Imaging provides a high-resolution, almost photograph-like view directly beneath the boat, showing details of the bottom structure. SideScan Imaging provides a view to either side of the boat, allowing you to scan a wider area for fish and structure. They complement each other for a comprehensive underwater view.

Q2: How do I update the charts on my Lowrance HDS?

A2: Chart updates typically involve downloading the latest chart data from the chart provider (Navionics, C-MAP, etc.) to a computer. Then, you transfer this data to your Lowrance HDS unit using a microSD card or a direct connection. The specific procedure varies depending on your chart type and Lowrance HDS model. Consult the Lowrance website and the chart provider's instructions for detailed guidance.

Q3: My Lowrance HDS is freezing. What should I do?

A3: A freezing Lowrance HDS usually indicates a software issue. Try a soft reset (power cycle) first. If the issue persists, performing a hard reset (refer to your manual) might be necessary. If problems continue, a software update may be required or contact Lowrance support for further assistance.

Q4: Can I connect my Lowrance HDS to my smartphone?

A4: Many modern Lowrance HDS models offer connectivity with smartphones through Wi-Fi or Bluetooth.
