Frequently Asked Questions (FAQ)

Q1: Where can I find a Tecumseh TVS75 TVS120 engine parts list?

A1: Many online retailers and small engine repair shops stock Tecumseh parts. Your repair manual may also include a parts list. Use your engine's model and serial numbers when searching online or contacting parts suppliers.

Q2: My engine won't start. What are the common causes?

A2: This could be due to several factors, such as a dead battery (if applicable), a fouled spark plug, a clogged air filter, a fuel delivery problem (blocked fuel line or carburetor issues), or low or old fuel. Your repair manual will provide a systematic troubleshooting guide to help diagnose the problem.

Q3: How often should I change the oil in my Tecumseh TVS75/TVS120 engine?

A3: Your manual will specify the recommended oil change intervals. Generally, for small engines like this, it's recommended to change the oil after every 25-50 hours of operation or at the end of each season, whichever comes first.

Check the oil level, inspect the air filter, and carefully examine the cooling fins for obstructions before operating your engine again. Consult your manual for troubleshooting steps.
