## Essential Parts and Common Replacements

The Stihl MS 460, like any powerful machine, experiences wear and tear. Certain parts require more frequent replacement than others. These commonly replaced parts often include:

- **Chain and Bar:** These components are subjected to significant stress, requiring regular sharpening and eventual replacement. The manual will guide you on correct chain tensioning and bar lubrication, both vital for extending their lifespan.
- **Air Filter:** A clogged air filter restricts airflow, impacting engine performance and potentially causing damage. Regular cleaning and periodic replacement are essential. Refer to your manual for cleaning instructions and replacement procedures.
- **Spark Plug:** The spark plug ignites the fuel-air mixture. A worn or faulty spark plug can lead to difficult starting and poor performance. Replacing it is a straightforward procedure clearly detailed in the manual.
- **Carburetor:** The carburetor regulates the fuel-air mixture. Malfunction can lead to poor running or starting issues. This is a more advanced replacement and should only be attempted with a good understanding of the procedures outlined in the

manual.

- **Fuel Filter:** Similar to the air filter, a clogged fuel filter restricts fuel flow, impacting engine performance. Regular inspection and replacement, as recommended by the manual, is vital.
