Question 1 (MCQ): What is the output of the following code snippet?

```
````java  

int x = 5;

int y = 10;

System.out.println(x + y);
````
```

Answer: 15

Question 2 (Coding Problem): Write a Java program that takes an integer array as input and returns the sum of its elements.

Answer:

```
```java

public class SumArray {

 public static int sumArrayElements(int[] arr) {

 int sum = 0;

 for (int i = 0; i < arr.length; i++)

 sum += arr[i];

 return sum;

 }

 public static void main(String[] args) {

 int[] numbers = { 1, 2, 3, 4, 5 };

 int total = sumArrayElements(numbers);

 System.out.println("Sum of array elements: " + total);

 }

}

```
```

Conclusion
