Understanding Your Westwood 1012 String Trimmer: Features and Specifications

The Westwood 1012 is a gas-powered string trimmer designed for tackling tough landscaping jobs. Key features often include a powerful engine for efficient cutting, a bump feed head for easy line replenishment, and an adjustable shaft for comfortable operation in various terrains. Specific specifications, such as engine displacement, cutting width, and weight, vary slightly depending on the model year and region. Always consult your specific Westwood 1012 manual for precise details regarding your unit's specifications. Understanding these **Westwood 1012 specifications** is crucial for selecting the correct fuel and oil mix, and for identifying potential problems. A well-maintained Westwood 1012, used correctly, can provide years of dependable service.

Key Features to Note:

- **Engine Type:** Typically a two-stroke gasoline engine, requiring a specific fuel/oil mixture.
- **Cutting Head:** Often a bump feed head, allowing you to advance the cutting line by tapping the head on the ground.
- **Shaft Adjustment:** The shaft allows for adjustment to suit different user heights and working conditions.
- **Safety Features:** Includes a safety switch and potentially other features designed to prevent accidental starting or operation.

Safe and Efficient Operation of Your Westwood 1012

Before starting any work with your Westwood 1012, carefully read the complete instructions in your **Westwood 1012 manual**. This section covers proper safety procedures, fuel mixing, starting and stopping the engine, and trimming techniques.

Preparing Your Trimmer:

- **Fuel Mixture:** Always use the correct fuel-to-oil ratio specified in your manual. Using the incorrect mixture can severely damage the engine.
