FAQ

Q1: What types of metal can the Pexto 152 shear cut?

A1: The Pexto 152 is designed to cut a variety of sheet metals, including mild steel, aluminum, brass, copper, and stainless steel. However, the thickness of the metal you can cut will depend on the specific model and the adjustment of the blade gap. Always consult the manufacturer's specifications to determine the maximum thickness for your specific tool.

Q2: How often should I lubricate my Pexto 152 shear?

A2: Lubrication frequency depends on usage. For frequent use, consider lubricating the moving parts after every few hours of operation. For less frequent use, lubrication every few weeks or months may suffice. Always refer to your *Pexto 152 shear manual* for the manufacturer's recommendations.

Q3: What should I do if my Pexto 152 shear makes a squeaking noise?

A3: A squeaking noise often indicates a lack of lubrication. Apply a suitable lubricant to the moving parts as per the manufacturer's instructions. If the squeaking persists after lubrication, it might indicate a more serious issue requiring professional attention.
